NUTRITION

IT'S ALL ABOUT THE INTAKE!

COW COUNTRY MULTI-SPECIES 18

Low moisture, cooked tubs for optimal animal nutrition. Consistent Nutrient Delivery
Made in the USA

ABOUT THIS PRODUCT

Cow Country Multi Species 18 is designed for all classes of sheep, goats, cattle and/or bison grazed in common pastures. This tub is designed as supplemental energy, protein, minerals and vitamins to aid in the digestion of low to moderate quality forage. Due to the uniform hard nature of the product daily intake is very consistent and predictable.

Cow Country Multi Species 18 contains yeast culture and yeast extract to promote gut health. The addition of dried *Aspergillus oryzae* fermentation product improves forage digestion. Concentrated B vitamins are included to encourage feed intake and aid in maintaining protein, fat and carbohydrate metabolism.

FEEDING DIRECTIONS

Feed at the rate of one (1) tub for every 25 to 35 head of cattle or 35 to 45 head of small ruminants. Place tubs in a dry area near loafing area, salt, and water. Self-fed consumption will depend on size of animals, weather conditions and source/quality of other feeds available. Typical intake for cattle and bison will range from 0.75 to 1.25 lb. and 1.0 to 5.0 ounces for sheep and goats.

Provide fresh clean water at all times.

NUTRIENT ANALYSIS

Crude Protein, min	18.0%
Crude Fat, min	5.5%
Calcium, min-max	1.5 – 2.0%
Phosphorus, min	0.8%
Selenium, min	4.4 ppm
Copper	None added
