COW COUNTRY STRESS TUB

Low moisture, cooked tubs for optimal animal nutrition. Consistent Nutrient Delivery
Made in the USA

ABOUT THIS PRODUCT

Cow Country Stress Tub is designed for cattle on pasture and calves at weaning or receiving into a new housing and feeding environment. This tub can be used for dairy cattle during the dry and transition period. The nutrient dense formula ensures intake of rumen friendly protein, energy and critical minerals and vitamins. Supplemental nutrition helps cattle better manage stress due to calving and management changes, such as weaning and moving to new housing and feeding environments.

Cow Country Stress Tub contains organic chelated trace minerals for improved bioavailability. The high level of vitamins promotes animal health and performance during times of stress. The additional nutrient delivery helps mature cows to recover quickly after calving and return to breeding condition.

FEEDING DIRECTIONS

Feed one (1) tub per every 25 to 35 head of cattle. Place tubs in a dry area near loafing area, salt, and water. Stress Tubs should be fed at the rate of 0.25 to 0.5 lb. per head daily. Free-choice salt should be offered to animals. Provide fresh clean water at all times.

WARNING

This product contains copper. **DO NOT FEED TO SHEEP.**

NUTRIENT ANALYSIS
